Property Description

This stunning and secluded 5 level villa spans 6,000 square feet, featuring seven spacious bedrooms and 7.5 luxurious bathrooms. The attention to detail in this superb property is second to none with beautifully carved wooden features, bamboo blinds and ceilings, rustic tiles, and natural stone decoration throughout the home. The design is at peace with nature and fits perfectly with its cliffside position as it emerges from the jungle like a magnificent treehouse. Being high up in the canopy and with the huge living area completely open on three sides means that you can be face-to-face with some of the beautiful and exotic animals and birds of Manuel Antonio, including three species of monkeys, sloths, toucans, and hummingbirds. This villa was designed and built to bring the rainforest into the home with an open-air living area on the top floor that enables the ocean breeze to flow directly into the home so there is no need for air conditioning in this part of the house.
